

# Thinking Doing Talking Science

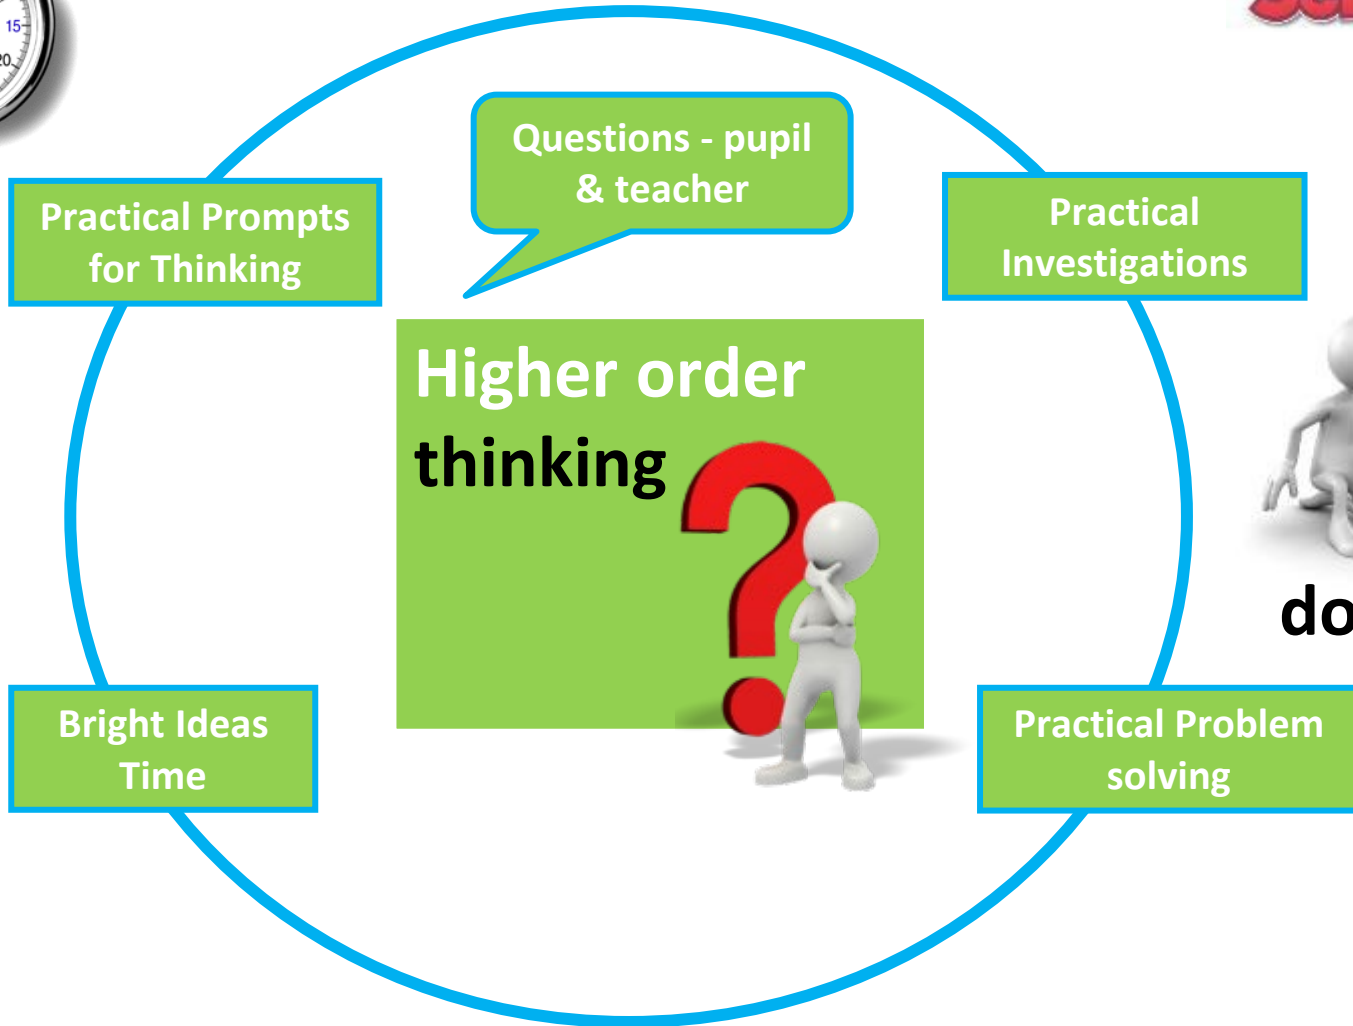

# Focused recording

## Creativity

**talking**

**doing**

# Sound and light

The strategies are generic and for all curriculum areas  
– we are exemplifying them through this topic

Sound is in  
Year 4 of NC  
(England)

But, most importantly,  
principles can be  
applied across all ages

Light is in Years  
3 & 6 of NC  
(England)

Also, not statutory when  
you cover what, as long as  
all completed by end of  
Key Stage 2

Remember:

There are subject knowledge notes in your  
**TDTScience Teacher Resources** folder.

Login and download here:

<https://tdtscience.org.uk/user-registration-primary>

You will find the subject knowledge files in the  
**General Resources** folder.

## Year 4

### **Pupils should be taught to:**

- identify how sounds are made, associating some of them with something vibrating
- recognise that vibrations from sounds travel through a medium to the ear
- find patterns between the pitch of a sound and features of the object that produced it
- find patterns between the volume of a sound and the strength of the vibrations that produced it
- recognise that sounds get fainter as the distance from the sound source increases

## Health & Safety

The activities you will be undertaking today have been risk assessed using guidance provided by CLEAPSS.

When planning to repeat any of the activities we are showcasing today, you must consult the risk assessment advice provided by your employer and adjust it to suit the needs of your class.

It is likely that your employer has identified CLEAPSS (England, Wales and NI) or SSERC (Scotland) as the source of H&S advice they want you to follow.

[www.cleapss.org.uk](http://www.cleapss.org.uk)

[primary@cleapss.org.uk](mailto:primary@cleapss.org.uk)

01895 251 496

[www.sserc.org.uk](http://www.sserc.org.uk)

[enquiries@sserc.scot](mailto:enquiries@sserc.scot)

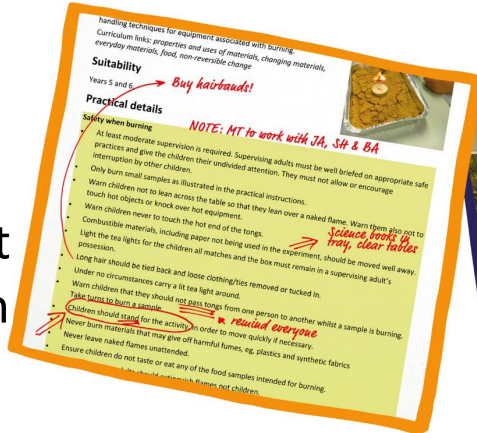

01383 626 070

If you do not know who provides your school with health and safety advice, ask your Headteacher, employer or business manager.

It is your employer's responsibility to provide you with suitable advice and training so that you can manage any risks arising in your lessons appropriately.

# Health & Safety – Risk Assessment

Annotated  
CLEAPSS safety  
notes document  
with steps taken  
appropriate to  
the cohort

Post-it note reminders  
of steps to be taken to  
keep the cohort safe

Planning annotated  
with steps to be  
taken e.g. additional  
supervision/ small  
group work

Key Success Criteria (to be displayed as steps for to.) Make it challenging (differentiated).	Resources Use of support	Modelling Opportunities. To whole class or groups)
To cut a hole in the middle of a piece of card using scissors. Look for neat accurate cutting, correct scissor hold. To learn how to use glue and safety under supervision.	Paper plates Cardboard from cereal boxes Kitchen roll inner tube Scissors Blue glue Plasticine Animal cut-outs Felt tips	Teacher to model how to cut hole in middle of plate. <b>RL to model glue gun use. MAX 5 at a time.</b>
	<b>AJ to support GB, EL, EH</b>

Use the equipment to try some sound activities

# Sound: Teaching the Key Concepts

Exemplifies a TDTScience approach to teaching sound and includes *illustrative* practicals

Reinforcing children's knowledge and understanding

See Day 4 Teacher Supplements folder

## Key question

- Is the aim of the lesson to develop the children's skills; knowledge and understanding; or both?
- What will be the focused learning objective(s)?
- What will the children record?
- What and how will you assess?

# The science of sound

Don't forget your  
subject knowledge  
notes

Reference to teacher  
resources may need  
adapting

High

Low

Loud

Quiet

# How sound travels

## Practical: Clucking cups

See the handout  
in your pack

Reference to  
teacher resources  
may need adapting

**Possible Learning Objective:** To draw a conclusion, based on your results

What would be the learning objective?

How would you assess the learning objective?

What would the children record?

## Key questions

- Is the aim of the lesson to develop the children's skills; knowledge and understanding; or both?
- In order to carry out the *practical* successfully:
  - what do the children already need to know/understand?
  - and/or what skills do they need to have?

# Practical: Make a musical instrument

See the Day 4  
Teacher Supplements

Use the plastic tray as a sound box –  
think why you need this!

**Your challenge:**

- Make something that produces 4 notes with different pitch
- How could you vary the volume?
- Record your findings in whatever way you wish so that they are really clear

**Learning Objective:**

- to report and present findings clearly

DON'T LIMIT YOUR  
CHALLENGES

**CHALLENGE  
YOUR LIMITS**

## Learning Objective:

- to report and present findings clearly

How would you assess the learning objective?

TAPS Plan for Focused Assessment of Science		
<b>Topic:</b> Sound	<b>Year 4</b> Age 8-9	<b>Title:</b> Investigating Pitch
<b>Working Scientifically</b> Plan: Ask relevant questions and use different types of scientific enquiries to answer them.		<b>Concept Context</b> Find patterns between the pitch of a sound and features of the object that produced it.
<b>Assessment Focus</b> <ul style="list-style-type: none"><li>• Can children suggest how to alter the pitch?</li><li>• Can children carry out simple tests of these ideas?</li></ul>		
<b>Activity</b> <i>Today we are acoustic scientists.</i> Show children some homemade 'musical instruments': elastic bands over shoe box, 'straw flute/pan pipes', 'sound sandwich' (lolly stick and straw harmonica), stretched balloon 'drum skin' over tube, glass bottle containing water to blow or tap. Explore how to play them to make a sound and ask the children to suggest which parts are vibrating. Ask children to record a range of questions that they could investigate, focusing on changing pitch (e.g. How does the width of the elastic band affect pitch?). Children then work in small groups investigating their questions, considering different ways to alter pitch.		
<b>Adapting the activity</b> Support: Provide question stems/scaffolded question cards, e.g. How does the ----- affect the ----- etc. Extension: Experiment with different instruments. Other ideas: Oscilloscope (borrow from local Secondary School / YouTube videos).		
<b>Questions to support discussion</b> <ul style="list-style-type: none"><li>• What are the differences between these sounds?</li><li>• Which sound is the highest/lowest?</li><li>• How could we alter the pitch?</li><li>• Does your question include what you want to change and what you are going to notice?</li><li>• How will you investigate your question?</li></ul>		
<b>Assessment Indicators</b> Not yet met: Can ask questions, e.g. which makes the highest sound? Makes some suggestions about what to do, but needs help in phrasing the question. Meeting: Can ask questions and turn them into a form that can be investigated. E.g. How does the size of the drum affect the pitch?		
Possible ways of going further: Can use their results to make a prediction to set up further comparative fair tests, e.g. I know that a small drum makes a high pitch so will a small recorder make a higher pitch than a long one?		

Teacher box 3 - use Q, discussion and observation. See TAPS pyramid for more eggs.

TAPS plan – Investigating pitch  
LO – to plan

# Creating a bridge

# Odd One Out

# HOT Question

How did the astronauts talk to each other on the Moon?

PMI

## Life without sound

P = Positive

I = Interesting

M = Minus

The Explorify logo consists of a black circle containing the word 'Explorify' in white. Below the circle are several colorful, stylized shapes: a blue jagged shape, a green curved shape, a yellow curved shape, an orange curved shape, and a red jagged shape.

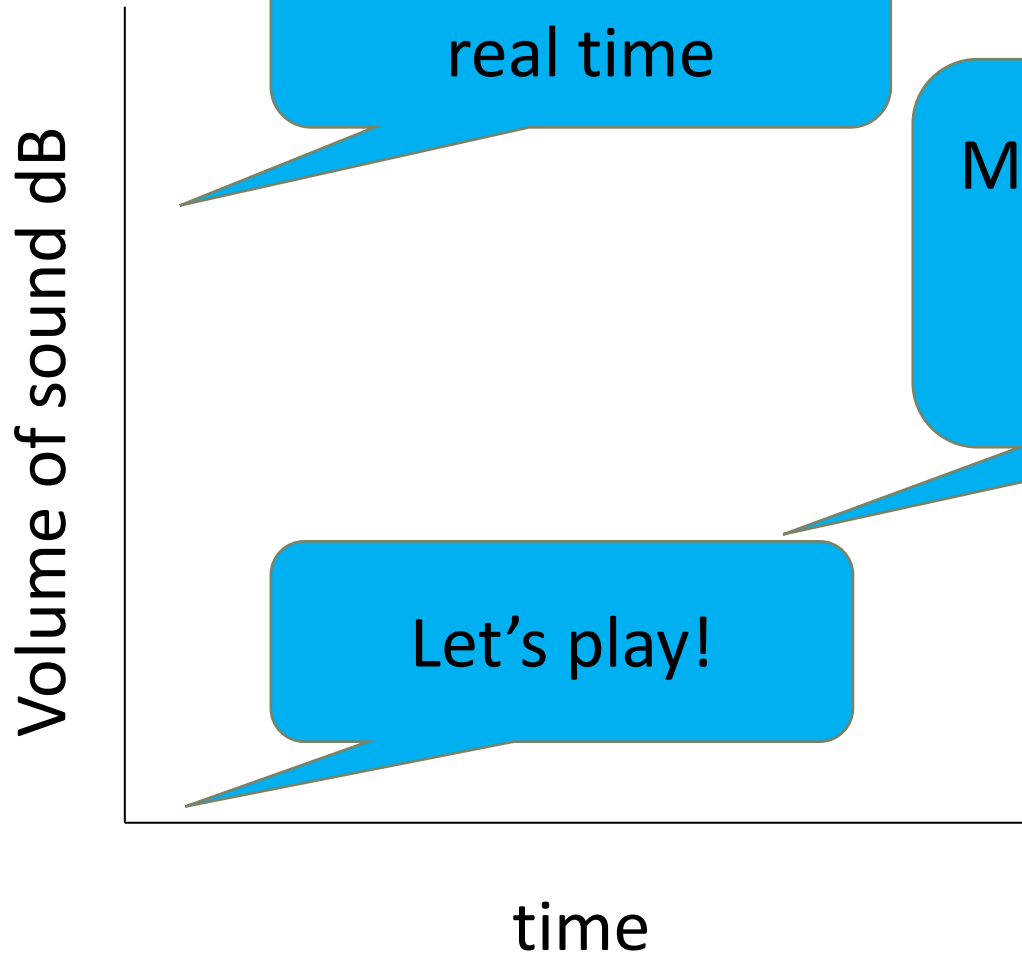

**Explorify**

**Video clip: The Sound of  
Silence**

Great as a discussion  
starter in the Bright  
Ideas Time

<https://explorify.uk/en/activities/whats-going-on/the-sound-of-silence>

# Plotting live sound graphs with a data logger

# Example 1: Where in the school?

Where do you think the datalogger was recording this data?

# Example 2: Where in the school?

Where do you think the datalogger was recording this data?

# Sharing of Good Practice

Repertoire of strategies

## You were asked to:

- Give feedback on any one science practical and the use of focused recording within it
- note some children's responses
- if possible, bring along examples of children's recording
- reflect on how you thought it went

In groups of four, share how it went in terms of:

- Children's responses
- Children's learning
- Children's behaviour

Share any examples of children's recording that you have brought with you.

**Light**

## Year 3

### **Pupils should be taught to:**

- recognise that they need light in order to see things and that dark is the absence of light
- notice that light is reflected from surfaces
- recognise that light from the Sun can be dangerous and that there are ways to protect their eyes
- recognise that shadows are formed when the light from a light source is blocked by an opaque object
- find patterns in the way that the size of shadows change.

## Year 6

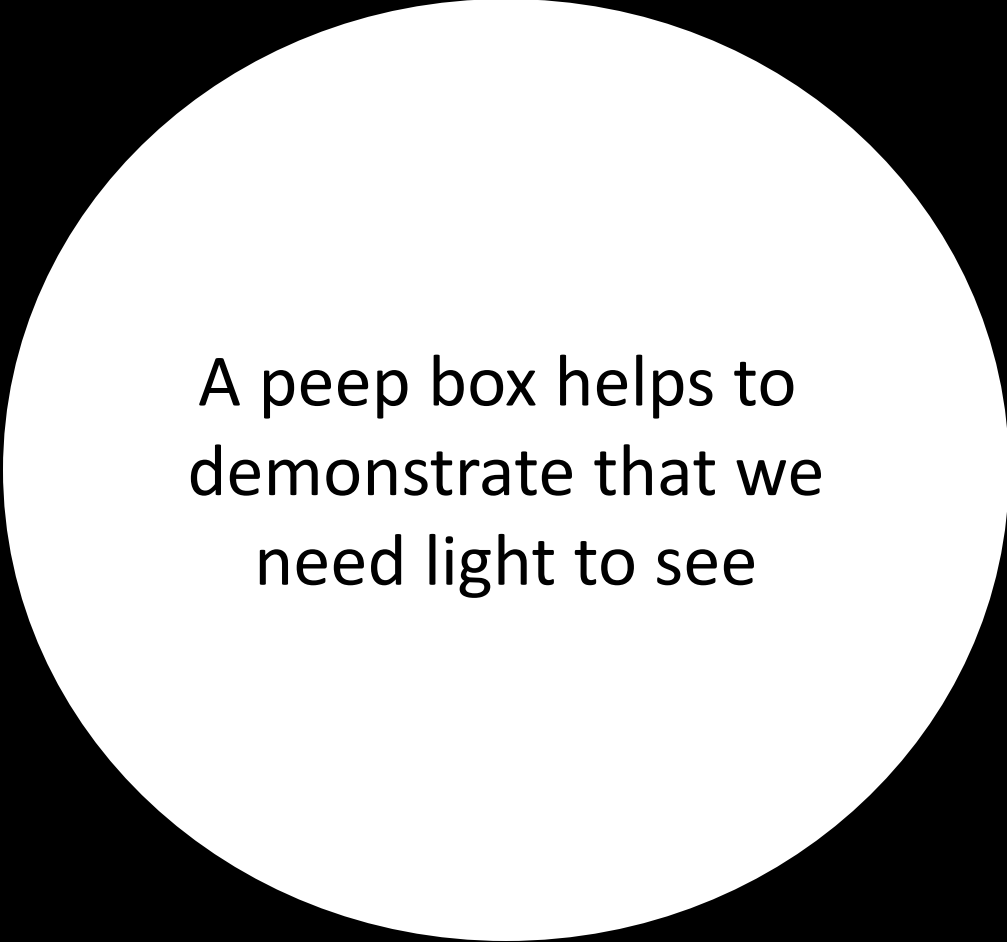

### **Pupils should be taught to:**

- recognise that light appears to travel in straight lines
- use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
- explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
- use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.

Darkness is the absence of light

Have you experienced pitch blackness?

A large white circle is centered on a black background. Inside the circle, the text "A peep box helps to demonstrate that we need light to see" is written in a black, sans-serif font, centered horizontally and vertically.

A peep box helps to  
demonstrate that we  
need light to see

## The Bright Ideas Time: The Concept Cartoon

# Year 1 children Light sources

Eye

Draw the rays of light to show how the eye sees the candle

Draw the rays of light to show how the eye sees the dog

# The active eye model

# 'Bunches' of light travelling to the eye:

What would demonstrate a more accurate understanding?

## Practical Prompt for Thinking

Full details of all Practical Prompts  
in the **General Resources** folder

In your handouts, there is a list of more **Practical Prompts for Thinking**, with:

- a list of the equipment needed,
- details of how to set them up
- the scientific explanation behind each one.

We hope you enjoy  
trying some of  
these

Shadows: what are the misconceptions here?

# A HOT Question

Why do the footballers have more than one shadow?

# A HOT Question

**Why does shadow length change during the day?**

**Why does shadow length change, for the same time of day, during the year?**

Which is the Odd One Out and why?

What are the key features of a good Odd One Out and why?

Would this be a better Odd One Out if it included the Sun rather than the Moon?

You (and/or your children) can make up your own Odd One Outs, HOT Questions, PMIs

# Practical: Hit the target

Details in the Day 4  
Teacher Supplements  
folder

Another example of a problem-solving activity, using similar skills but more suited for Design & Technology:  
**Design a lighting system for an Egyptian tomb**

Details of Egyptian Tomb in Day 4 Teacher Supplements folder

A row of ten matches is shown against a solid red background. The first match on the left is lit, with a bright yellow and orange flame rising from its tip. The other nine matches are unlit and stand in a straight line to the right of the first one. The text "Leading TDTScience in your school" is centered in white over the red background.

**Leading TDTScience in your school**

Individually describe  
'what TDTScience is' in  
one or two sentences.

Please write this on a  
post-it (and add to the  
evaluation later).

What  
about  
OfSTED?

TDTScience is  
evidence  
based

“Inspectors found that, in the majority of primary schools, disproportionate amounts of curriculum time were being spent on English and mathematics, often to prepare for tests. This significantly reduced the amount of curriculum time available to teach science, which in turn led to narrowing of the curriculum.” **OfSTED 2021**

**Ray of  
hope**

“...teachers’ subject knowledge and their depth of planning were not strong enough to ***sequence the knowledge and skills*** that pupils needed to learn before carrying out practical experiments. Too frequently, ***the activities carried out were not deepening pupils’ understanding of the scientific concept...***” **OfSTED 2019**

“Teachers generally had secure subject knowledge.” **OfSTED 2023**

# The value of the Bright Ideas Time

“Alongside [clear teacher explanations], pupils benefit from time to discuss ideas, answer questions and practice using the knowledge.”

**OfSTED 2023**

“Ensure that pupils have a secure knowledge of what has been taught, before moving on to more content. This should include checking whether pupils have specific misconceptions.”

**OfSTED 2023**

# The value of Practical Prompts for Thinking

“... practical demonstrations have been shown to play an important role in helping pupils to learn science, involve minimal costs and can save valuable time.” **OfSTED 2023**

“Clear explanations from teachers, alongside carefully selected teaching activities, supported the learning of specific content and played a key role in helping pupils to learn science.” **OfSTED 2023**

## The value of purposeful practical work

High quality education:

“The purpose of practical work is clear in relation to curriculum content so that practical activities can be set up and managed to develop pupils’ disciplinary and/or substantive knowledge.” –

*Working scientifically and knowledge & understanding* **OfSTED 2021 & 2023**

# The value of subject-specific CPD

## High quality science education:

“Teachers ... have access to high-quality subject-specific CPD to develop subject knowledge and pedagogical content knowledge. This is aligned to the curriculum.” **OfSTED 2021**

“Access to science-specific CPD is particularly important for primary teachers, given that they frequently teach outside their subject specialism, and that some reported a lack of confidence in teaching science.”  
**OfSTED 2023**

Subject knowledge has been addressed throughout TDTScience.

# TDTScience lessons

...on skills development *and* knowledge and understanding

**Building up to:  
The TDTScience Way**

**Learning  
Objectives**

**Bright  
Ideas Time**

**Practical**

**Focused  
Recording**

**Higher Order Thinking**

# Crafting a lesson

HOT

Bright Ideas  
Time

Practical

Skills *and*  
understanding

The different  
elements of a  
TDTScience lesson  
fit together

# Key questions we addressed throughout TDTScience

- Is the aim of the *lesson* to develop the children's skills; knowledge and understanding; or both?
- What will be the focused learning objective(s)?
- In order to carry out the *practical* successfully:
  - what do the children already need to know/understand?
  - and/or what skills do they need to have?
- What will the children record?
- What and how will you assess?
- Where and how to encourage children's HOTS?

In **General Resources** folder

## Crafting a Lesson: Planning Support

### A TDTScience lesson

**The focused learning objectives:**

Knowledge and understanding:

Working Scientifically skills:

**Related Bright ideas Time**

**Practical** – possibly a simulation (acting ideas out), research from secondary sources etc

**Focused Recording method** (assessment of learning objectives)

**Where is the Higher Order Thinking?**

# Crafting a Lesson: Examples

There are examples of '**Crafted Lessons**' in your **General Resources** folder.

In pairs, look at one of these and use the Planning Support Tool to identify the TDTScience elements and how they are crafted together.

Where is the HOT?

Evidence shows that unguided 'discovery' approaches are not effective. Instead, pupils learning science benefit from systematic teaching approaches that carefully scaffold their learning.

**OfSTED 2021**

Try 'Electricity: structured challenges' in Day 4 Teacher Supplements – a systematic way to teach electricity in Years 4 & 6

There is clear evidence that, done well, *structured* discovery enables children to undergo deep learning.

And Electricity subject knowledge notes in **General Resources** folder

**Electricity via structured challenges  
– see Day 4 Teacher Resources**

# Electricity

## Year 4 – pupils should be taught to:

- identify common appliances that run on electricity
- construct a simple series electrical circuit, identifying and naming its basic parts ...
- identify whether a lamp will light in a simple series circuit ...
- recognise that a switch opens and closes a circuit ...
- recognise some common conductors and insulators ...

## Year 6 – pupils should be taught to:

- associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit
- compare and give reasons for variations in how components function ...
- use recognised symbols in a simple circuit diagram

Using only the kit given to you,  
make the bulb light

Don't forget  
the safety talk!

What type of practical was this?

Was the aim to teach National Curriculum skills or understanding, or both?

What might be a learning objective?

# Leading TDTScience in your school

01  
**Develop pupils' scientific vocab**

Identify science-specific vocabulary.  
Explicitly teach new vocabulary and its meaning, creating opportunities for repeated engagement and use over time.

02  
**Encourage pupils to explain their thinking, whether verbally or in written**

Create a collaborative learning environment.  
Capitalise on the power of dialogue.  
Cultivate reasoning and justification.

03  
**Guide pupils to work scientifically**

Explicitly teach the knowledge and skills required to work scientifically, guiding pupils to apply this in practice, with opportunities for discussion and reflection.

04  
**Relate new learning to relevant, real-world contexts**

Consider real-world contexts.  
Engage with science concepts supported by virtual models.

05  
**Use assessment to support learning and responsive teaching**

Plan teaching that builds on existing knowledge and experiences.  
Monitor pupils' learning to inform responsive teaching, feedback, and next steps.  
Summarise what pupils have learned against planned criteria.

06  
**Strengthen science teaching through effective professional development, as part of an implementation process**

Use a range of information to identify development priorities and professional learning needs.  
Consider factors of high quality professional development to plan or evaluate provision.  
Reflect on senior leadership support at the strategic to classroom level.

**Bright Ideas Time** and focus on thinking and talking

**HOT** is at the heart of the TDTScience approach

**TDTScience in a nutshell** – literally what it says on the tin!

Strategies such as **PMI** and **problem solving** provide real-world context

**Focused recording** supports assessment and TDTScience links to Assessment for Learning (AfL).

TDTScience is CPD with **evidence of impact** on children's attainment.

# Small Changes...

- Deeper thinking
- More discussion
- More questioning
- More practical activity (clear purpose)
- Less writing (focused recording)

e.g. a Bright Ideas Time in every science lesson in the school is a good first step

# Big Impact

Excellence in teaching is the single most powerful influence on achievement.

*John Hattie 2002*

# Dissemination tactics

**Discuss:** Key elements of an effective staff meeting?

## Some key elements of an effective staff meeting:

- valuing colleagues as professionals
- ownership
- relevant
- interactive
- manageable
- practical
- feedback
- enjoyment

## Other tactics:

Staff meeting

Academy group

Year group/Key Stage planning

Meet science co-ordinator

Observation

Team teaching

Chat to friend over coffee

Plan jointly with one other teacher

**N.B. Revisit – not one-offs!**

# Think about your situation:

- plan dissemination tactics

Actions

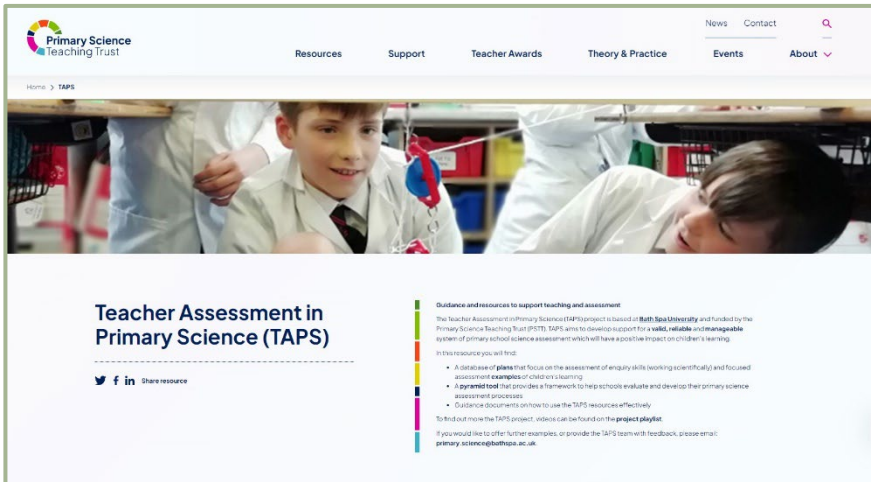

Time scale

Monitoring

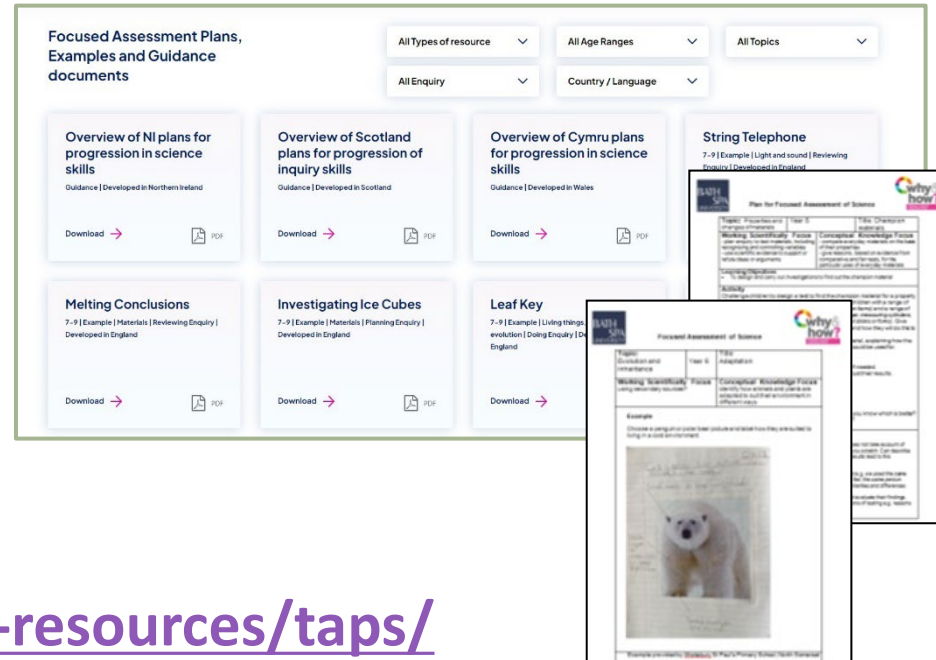

# Teacher Assessment in Primary Science (TAPS)

- Aiming to develop support for valid, reliable and manageable science assessment which will have a positive impact on children's learning.
- Free online resources:
  - Pyramid school self-evaluation tool with examples of practice in schools
  - Focused assessment database with plans and examples of children's learning

The screenshot shows the homepage of the Primary Science Teaching Trust. The header includes the logo and navigation links for Resources, Support, Teacher Awards, Theory & Practice, Events, and About. A main banner image shows two young boys in a science lab. Below the banner, the title 'Teacher Assessment in Primary Science (TAPS)' is displayed, followed by a brief description and a list of key features: a database of plans, a framework for evaluation, and guidance documents. Social media icons for Facebook and LinkedIn are also present.

The screenshot displays the 'Focused Assessment Plans, Examples and Guidance documents' interface. It features a grid of resource cards, each with a title, a brief description, and a 'Download' button. The cards include: 'Overview of NI plans for progression in science skills', 'Overview of Scotland plans for progression of inquiry skills', 'Overview of Cymru plans for progression in science skills', 'String Telephone', 'Melting Conclusions', 'Investigating Ice Cubes', and 'Leaf Key'. On the right side, there are filter menus for 'All Types of resource', 'All Age Ranges', 'All Topics', 'All Enquiry', and 'Country / Language'. Two example documents are shown in the foreground: one titled 'Plan for Focused Assessment of Science' and another titled 'Focused Assessment of Science' featuring a polar bear illustration.

<https://pstt.org.uk/unique-resources/taps/>

## Reminder: TAPS Focused Assessment Plans

Lesson plans that have built in focused assessment in each area of the curriculum and year group.

## And: TAPS Focused Assessment Examples

Examples from schools of focused assessment in each area of the curriculum and year group.

**We highly  
recommend TAPS!**

**See examples in  
Day 3 Teacher  
Supplements folder**

<https://pstt.org.uk/unique-resources/taps/>

## A helpful planning tool:

<https://www.york.ac.uk/ciec/resources/primary/skills-for-science/#working-scientifically>

Download from the website

This sets out the Progression of Enquiry Skills from Early Years Foundation Stage to Key Stage Three. So, this will help with a ***coherent whole school plan*** that reinforces prior learning and builds on it.

Grids and posters

### WORKING SCIENTIFICALLY IN THE PRIMARY CLASSROOM:

Progression of Enquiry Skills from EYFS to KS3

# PLAN Progression in knowledge and working scientifically

This document shows the links between the topics taught in different year groups, so that you can easily check that teachers are covering the correct content for their year group.

**Planning for progression  
in knowledge**

<b>Forces</b>	
<b>Birth to three</b>	<ul style="list-style-type: none"><li>• Repeat actions that have an effect.</li></ul>
<b>Nursery</b>	<ul style="list-style-type: none"><li>• Explore how things work.</li><li>• Explore and talk about different forces they can feel.</li><li>• Talk about the differences between materials and changes they notice.</li></ul>
<b>Reception</b>	<ul style="list-style-type: none"><li>• Explore the natural world around them.</li><li>• Describe what they see, hear and feel whilst outside.</li></ul>
<b>Year 1</b>	
<b>Year 2</b>	<ul style="list-style-type: none"><li>• Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. (Y2 - Uses of everyday materials)</li></ul>
<b>Year 3</b>	<ul style="list-style-type: none"><li>• Compare how things move on different surfaces.</li><li>• Notice that some forces need contact between two objects, but magnetic forces can act at a distance.</li><li>• Observe how magnets attract or repel each other and attract some materials and not others.</li><li>• Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials.</li><li>• Describe magnets as having two poles.</li><li>• Predict whether two magnets will attract or repel each other, depending on which poles are facing.</li></ul>
<b>Year 4</b>	
<b>Year 5</b>	<ul style="list-style-type: none"><li>• Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.</li><li>• Identify the effects of air resistance, water resistance and friction, that act between moving surfaces.</li><li>• Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.</li></ul>
<b>Year 6</b>	
<b>Key Stage 3</b>	<ul style="list-style-type: none"><li>• Magnetic fields by plotting with compass, representation by field lines.</li><li>• Earth's magnetism, compass and navigation.</li><li>• Forces as pushes or pulls, arising from the interaction between two objects.</li></ul>
